uRos2026 Programme

Conference Programme

Paris · 18–20 November 2026

PROGRAMME

Wednesday, 18 November 2026 - Tutorial Day

Time	Auditorium	Bloch-Lainé 1 (access “cour”)	Bloch-Lainé 2 (access “rue”)
09:00–10:30	**Getting Started with Positron: A Next-Generation IDE for Data Science** François Michonneau, Christophe Dervieux, Mine Çetinkaya-Rundel	**Spatial Analysis and Cartography with R** Kim Antunez	
10:30–11:00	**Coffee break**		
11:00–12:30	**R in the Age of LLMs: From AI-Assisted Development to Chat-Based Data Applications - I** François Michonneau	**Mapping Official Statistics with the tmapverse and cols4all** Martijn Tennekes	**Managing statistical disclosure control from microdata to protected linked tables with rtauargus** Nadège Ferrer-Pradines, Julien Desclodure
12:30–13:30	**Lunch Break**		
13:30–15:00	**R in the Age of LLMs: From AI-Assisted Development to Chat-Based Data Applications - II** François Michonneau	**From Data to Models: Hands-On Machine Learning with R** Adrián Pérez Bote, Sandra Barragán Andrés	**Working with categorical data and codelists in R** Jan van Der Laan, Edwin de Jonge
15:30–16:00	**Coffee break**		
16:00–17:30	**Opening the Black Box: Interpreting Machine Learning Models with SHAP Values in R** Thelma Panaiotis		**Tidy Survey Analysis in R: Working with Weights and Sampling Designs for Official Statistics** Stephanie Zimmer, Rebecca Powell, Isabella Velásquez

PROGRAMME

Thursday, 19 November 2026 - Conference Day 1

Time	Auditorium	Bloch-Lainé 1 (access “cour”)	Bloch-Lainé 2 (access “rue”)
08:00–09:00	**Registration and walk-in**		
09:00–09:15	**Opening**		
09:15-10:15	**Keynote: R and Open-Source: A love story** Rebecca Killick (chair: Anna Smyk)		
10:15–11:00	**EMOS session I** (chair: Tina Steenvoorden)		
11:00–11:30	**Coffee break**		
11:30–13:00	**A1 - AI Assistants for Statistical Production** (chair: Nina Niederhametner)	**B1 - Reproducible Statistical Production Pipelines** (chair: Ana-Maria Ciuhu)	**C1 - Automated and Accessible Statistical Publishing** (chair: Johannes Straubinger)
13:00–14:00	**Lunch break**		
14:00–15:30	**A2 - AI, Machine Learning and Intelligent Automation** (chair: Sandra Barragán Andrés)	**B2 - Lightning Talks I: Production, Validation and Survey Methods** (chair: Mark van der Loo)	**C2 - Shiny Applications and Statistical Visualisation** (chair: Bernhard Meindl)
15:30–16:00	**Coffee break**		
16:00–17:30	**A3 - Open Source Adoption and the R Community** (chair: Alexander Kowarik)	**B3 - Seasonal Adjustment in Official Statistics** (chair: Rebecca Killick)	**C3 - Statistical Disclosure Control and Synthetic Data** (chair: Ciprian Alexandru)

EMOS session I

Presentations

- An R Framework for AI-Assisted Questionnaires in Official Statistics: An Application to Financial Literacy Surveys
  Valeria Rossi
- Developing a territorial One Health indicator using R
  Carmen Limone Fenicia
- Long-Term Effects of the Czech National Bank’s Exchange-Rate Commitment: A Synthetic Control Approach in R
  Ondřej Valtr

A1

AI Assistants for Statistical Production

- 110 billion euros, one deadline, zero regression: migrating a critical calculation service to R with AI
  Vincent Guyader, Matthieu de Canteloube
- An AI-Powered Analysis Assistant for Large-Scale Official Statistics
  Oliver Hauke
- Large Language Models as Assistants for Time Series Analysis in Official Statistics: Opportunities for Innovation and Capacity Building
  Jelena Suzić
- Scaling Local LLM Coding Assistants for R, Python and SAS in Official Statistics
  Bernhard Fischer
- Using LLM’s for automated translation of Excel files and SAS scripts to R
  Andreas Jahn

B1

Reproducible Statistical Production Pipelines

- Modernizing Global Survey Data Processing: Reproducible R Pipelines at the IEA
  Winfried Moser-Nussgruber, Kamil Kowolik
- Integrating Time Series Processing into an Automated Production Workflow in R
  Suzanne Heidsieck
- Spipe: a lightweight workbench for building and monitoring reproducible analytical pipelines in R, illustrated on the GEM Luxembourg production and analysis chain
  Maxime Pettinger
- The {ProduceR} package: streamlining and improving the reliability of statistical production
  Vincent Reduron
- Building an internal package ecosystem for data processing
  Viktoria Kis, Erika Lee, Simon Normandeau, Sara Otavo Peña

C1

Automated and Accessible Statistical Outputs

- Automated Public Science Communication: Building a Bluesky Bot for Real-Time Official Statistics Visualisation with R
  Damien Dupre
- Beyond parametrised reports: Adventures automating country notes at the OECD
  Maria Paula Caldas Rivera, Rodolfo Ilizaliturri López
- From code to print-ready publication: Automating layout at the French Ministry of Justice
  Adam Marsal, Fanny Allard
- Reproducible Statistical Publications with Quarto
  Christophe Dervieux
- From Data Acquisition to Harmonised Outputs: A Reproducible R Workflow for Official Statistics
  Ciprian Alexandru

A2

AI, Machine Learning and Intelligent Automation

- Beyond Use Cases: Modular R Packages for Automated Coding and Data Extraction
  Nina Niederhametner, Eileen Vattheuer, Marlene Steiner
- Bridging R and Python for AI-Driven NLP
  Georgios Lykos, Spyridon Dimas, Georgia Panagopoulou, Michail Vikentios
- Structuring Annual Reports for Official Statistics: A Method for Data Editing Using Large Language Models
  Bjørkholt Solveig, Mona Islam Mousumi, Sarah Torvholm Frøystad, Odin Johansen, Maryam Javed
- A Comparison of Model-Based and Unsupervised Learning Methods for Detecting Scaling Errors in R
  Marcello D'orazio, Cristina Faricelli, Renato Magistro

B2

Lightning Talks I: Production, Validation and Survey Methods

- How many R packages in CRAN do you know?
  Patrice Kiener, Christophe Dutang
- Template and Function: A Tabular Configuration Pattern for Large Scale Operations on Files with Varying Schemas in Official Statistics
  Daniel Rakotomalala
- R you useful for maintaining information systems?
  Alice Mainguené
- {IssueTrackeR}: Handling Tickets in R
  Tanguy Barthelemy
- From Data to Publication : An Automated R-Based Framework for Consumer Price Index Reporting
  Zineb Aoulad Hammou Achou, Zakariae Halhal
- Facilitating R-Based Statistical Validation Through EZR: A Case Study in Melanoma High-Frequency Ultrasound Assessment
  Kyrylo Chalyy, Roman Hryshchenko, Olga Bogomolets, Viktor Stepanenko
- Manual Rework Volume Monitoring and Forecasting Tool
  Yves Coltier
- Semi-automated editing of large volumes of foreign trade data for the environmental Economy-Wide Material Flow Account
  Gorka Campandegui García, Julia Maestro López
- VIM::vimpute: A Unified Imputation Engine for Flexible Missing Data Workflows in R
  Alexander Kowarik, Eileen Vattheuer, Matthias Templ, Johannes Gussenbauer, Nina Niederhametner

- Sampling Designs and Sample Quality Control: Using Quarto Documents in Agricultural Surveys
  Michael Levi-Valensin
- RISQ: Representativity Indicators for Survey Quality
  Reijer Idema
- SmartSurveyAgent: A New Approach to Survey Data Collection in Official Statistics
  Simona Cafieri

C2
Shiny Applications and Statistical Visualisation

- Rapid Crisis-Oriented Survey Visualization in Official Statistics: Flood Damage in Polish Agriculture Using R
  Kamil Grabarczyk
- phsshiny: An R Package for Standardisation and Accessibility in the Publication of Health Data
  Ciara Gribben, Russell Mccreath, Bateman Mcbride
- R Shiny Platform for Detecting, Validating, and Reporting River Overflow Periods
  Vahe Movsisyan, Madoyan Habet, Ina Karapetyan
- Creating population pyramids in less than 100 lines of code
  Michael Neutze

A3
Open Source Adoption and the R Community

- Beyond code: supporting teams through the transition to Open Source
  Raphael Simon, Vincent Biot, Nathalie Rigollot, Meriem Said
- From SAS to R, one small step for data production, one giant leap for official statistics
  Pierre Lamarche, Clément Rousset
- Towards metrics for awesome software packages: first results
  Olav ten Bosch, Mark van Der Loo
- What makes the R community unique?
  Romain Lesur
- Publishing in the R Journal
  Mark van Der Loo

B3
Seasonal Adjustment in Official Statistics

- Assessing Direct and Indirect Seasonal Adjustment Approaches for Labour Cost Indices: A Serbian Case Study
  Jelena Suzić, Melinda Tokai, Dunja Katić, Ana Markovic
- pickmdl3: An R package implementing the X-12-ARIMA pickmdl procedure within the JDemetra+ R framework
  Jens Kristoffer Haug, Øyvind Langsrud, Ane Seierstad, Susie Jentoft, Ivar Hamre Jørn, Quang Pham Dinh
- regimeseats: An Adaptive State-Space Extension for TRAMO-SEATS in Official Statistics
  Cheyenne Amoroso, Germán Aneiros, Carolina García-Martos, Jan Koopman Siem, José A. Vilar
- The RJDverse Package Suite for Time Series Econometrics in Official Statistics
  Karsten Webel, Anna Smyk
- {stlpro}: Seasonal Adjustment with Cross-Validated Filter Selection
  Daniel Ollech

C3
Statistical Disclosure Control and Synthetic Data

- A wavelet protection method for publishing maps
  Edwin de Jonge
- ckm: an easy application of cell-key method to protect tabular data
  Nadège Ferrer-Pradines, Julien Desclodure, Dimitri Lemaire
- Protecting linked tables with non-nested hierarchies: a use case with rtauargus
  Nadège Ferrer-Pradines, Julien Desclodure, Dimitri Lemaire
- rebalancedNoise: Perturbative Statistical Disclosure Control for Magnitude Tables in R
  Bernhard Meindl

PROGRAMME

Friday, 20 November 2026 - Conference Day 2

Time	Auditorium	Bloch-Lainé 1 (access “cour”)	Bloch-Lainé 2 (access “rue”)
08:00–09:00	Registration and walk-in		
09:00–10:00	**Keynote: Practical AI for Data Science** Simon Couch (chair: Mark van der Loo)		
10:00–10:50	**EMOS session II** (chair: Tina Steenvoorden)		
10:50–11:15	Coffee break		
11:15–12:45	**A4 - Survey Sampling, Weighting and Variance Estimation** (chair: Ivana Levačić)	**B4 - Social and Economic Applications** (chair: Cristina Rodica Boboc)	**C4 - Infrastructure and Tools for Statistical Production** (chair: Martijn Tennekes)
12:45–13:45	Lunch break		
13:45–15:15	**A5 - Spatial and Small Area Analysis** (chair: Romain Lesur)	**B5 - Lightning Talks II: R Tools, Visualisation and Applications** (chair: Alexander Kowarik)	**C5 - Imputation and Advanced Statistical Methods** (chair: Marcello d’Orazio)
15:15–15:45	Coffee break		
15:45–17:15	**A6 - Nowcasting and Time-Series Methods** (chair: Tanguy Barthelemy)		**C6 - Data Integration, Survey Processes and Quality** (chair: Bernhard Fischer)
17:15–17:30	Closing		

EMOS session II

Presentations

- Typology of business ecosystems in European Union countries
  Dalidovich Ulada
- AI, Robotization and Perceived Occupational Displacement across European regions - an R based Spatial Econometrics Analysis
  Vlad-Andrei Petre, Smaranda Cimpoeru
- R-Based Visualization of Continuous-Time Markov Migration Models
  Anna Boukouvala, George Tsaklidis
- Subsampling Non-Response Follow-Up in the Canadian Housing Survey: Comparing the Historical Hansen-Hurwitz Method and Non-Probability Estimation
  Thomas Guinhut

A4

Survey Sampling, Weighting and Variance Estimation

- Calibration of Survey Weights in R: A Comparative Overview of Available Packages
  Marcin Szymkowiak, Kamil Wilak
- Developing an R Package for Sample Weight Estimation
  Guillaume Osier, Claude Lamboray
- samplyr: A Tidy Grammar for Survey Sampling Design in R
  Dicko Ahmadou
- Making gustave production-ready: multistage designs, wrapper inspection and estimation diagnostics.
  Thomas Delclite
- weightflow: a declarative, auditable recipe for survey weighting in R
  Juan Pablo Ferreira

B4

Social and Economic Applications

- Behind-the-Scenes Complexity, Clear Insights Up Front: Longitudinal Minimum Income Benefit Analysis in a French Local Authority, from Database to Simple Indicators
  Elie Chosson
- Event-sequence analysis of fertility histories with TraMineR, INDSCAL and DISQUAL
  Elisabeth Morand
- Mental health and social participation: A data-driven analysis using R
  Camelia Maria Dan, Cristina Rodica Boboc
- Reconciling Local and National Demographic Accounts in R
  Daniel Ward

C4

Infrastructure and Tools for Statistical Production

- AccScript: an R-based domain-specific language for reproducible national accounts production
  Iliass Taleb
- DuckDB beyond R: demystifying the analytical database in your toolbox
  Ines Hiverlet
- National Accountant: A Reproducible R-DuckDB Framework for Balancing Supply and Use Tables with Hard and Soft Constraints
  Alpay Kocak Necmettin
- procR: New Features for End-to-End Table Production in Official Statistics -Younes Saidani, Ngoc-Han Tran
- codelist: working more efficiently with code lists in R
  Jan van Der Laan

A5

Spatial and Small Area Analysis

- 3D Thematic Mapping in R with tmap v4 and tmap.mapgl
  Martijn Tennekes
- Measuring Spatial Inequalities in University Accessibility Using R and GTFS Data: Evidence from Rome
  Armando D'aniello, Gianluigi Salvucci
- Bayesian Small Area Estimation for Multinomial Health Indicators Using R: An Application to Official Statistics
  Ioannis Nikolaidis, Stefanos Giakoumatos
- Small Area Estimation of Poverty in the Practice of Statistics Poland
  Marcin Szymkowiak, Kamil Wilak, Tomasz Józefowski, Nobuo Yoshida
- Automating Educational Statistics Production Processes Using R and Shiny: A Case Study from Turkish Statistical Institute
  Fethi Saban Ozbek

B5

Lightning Talks II: R Tools, Visualisation and Applications

- Common pitfalls when switching from SAS to R
  Pierre Lamarche
- ILSAmerge and ILSAstats: Two new R packages for international large-scale assessments
  Andrés Christiansen
- {loomer} - A high-performance auxiliary R package for analyzing the Danish Lifelines dataset
  Ilya Kashnitsky
- Further microdata anonymisation tools in R
  Marco Caputi
- Automatic classification of pastoral-use parcels / Classification automatique des parcelles à usage pastoral
  Romuald Thion
- Use of R Packages for Cartography: The Case of Road Traffic Accident Statistics in Luxembourg
  Guillaume Osier, Alexi Dere, Lucile Bodson
- Mapping the Gendered Impact of Economic Shocks: A Spatial Analysis of Mancession vs. Shecession across European Regions
  Andreea-Denisa Trascan, Camelia-Maria Dan
- One R, Many Stories: R as a Visual Language to Tell a Country's Public Health Narrative
  Jerico Bajador
- Estimating French election results like the pollsters from partial vote counts on election night: a transparent, reproducible R approach based on open public data
  Thomas Guinhut, Eulalie Delaune, Romain Winckell

- The Effects of Skills on Gender Wage Inequality in the Digital Economy
  Gianina-Maria Petrașcu, Andreea-Denisa Trascan
- Why Do Some Counties Perform Better? Educational Hubs, High-Tech Development and Skills Mismatch in Romania
  Cristina Boboc, Gianina Maria Petrașcu
- The Intellectual Architecture of Artificial Intelligence-Driven Work Transformation: A Large-Scale Scientometric Exploration of Global Research Dynamics
  Ioana Barbulescu, Ana-Maria Ciuhu, Valentina Vasile, Andrei Suciu, Razvan Vasile

C5

Imputation and Advanced Statistical Methods

- Preprocessing Categorical Variables through Edit-Induced Equivalence Classes in ARTIC
  Simona Toti, Romina Filippini
- Aggregating incomplete data: accounting for hierarchical relationships
  Viktoria Kis, Erika Lee, Simon Normandeau, Sara Otavo Peña
- Estimate distributions with fat and skewed tails with the FatTailsR package
  Patrice Kiener
- What's new for time-to-event data in tidymodels
  Hannah Frick

A6

Nowcasting and Time-Series Methods

- An R-Based Nowcasting Dashboard for Industrial Production Index: Comparative Analysis of Classical and Machine Learning Methods
  Duygu Dedeoglu, Osman Sert
- Harvesting Data as Crops Are Harvested : An Automated R Pipeline for Timely Yield Estimates
  Hanan Touzani
- Making Singular Spectrum Analysis More Accessible: A Step-by-Step Framework and R Implementation
  Eulalie Delaune
- Using R to provide a new interface to an old time series program
  Guy Mélard
- KOMA - An R package for Bayesian estimation of simultaneous equation models
  Samad Sarferaz, Merlin Scherer

C6

Data Integration, Survey Processes and Quality

- Linking Administrative Data Without Unique Identifiers: A randomForest Approach in R
  Christopher Nölting, Murad Hajiyev
- postlink: An R Package for Post-Linkage Data Analysis
  Priyanjali Bukke, Gauri Kamat, Jiahao Cui, Roee Gutman, Martin Slawski
- BuSuCo: A package for business survey coordination
  Johannes Straubinger
- The Survey Fieldwork Digital Twin: An R-Based Early-Warning System for Mixed-Mode Official Statistics
  Hakile Resulbegovig, Vuk Čađenović
- The Metadata Quality Assistant (MQA): an R/Shiny prototype for supporting the preparation of SIMS quality reports
  Vasiliki Spiliopoulou, Christina Pierrakou, Konstantinos Molfetas
